PROJECT

Breast Cancer Prediction Using Deep Learning [GitHub](#)

2026

- **Developed** a CNN-based Breast Cancer Prediction System using Python, TensorFlow, Keras, OpenCV, and Flask to classify histopathological images into Normal, Benign, and Malignant categories.
- **Applied** image preprocessing, feature extraction, and deep learning techniques to improve prediction accuracy and enhance model performance.
- **Built** a Flask-based web application that allows users to upload histopathological images and receive real-time cancer prediction results through an intuitive interface.
- **Utilized** Python, TensorFlow, Keras, OpenCV, Flask, and MySQL to develop an end-to-end intelligent healthcare solution for automated breast cancer diagnosis.

Personal Portfolio Website [GitHub](#)

2026

- **Developed** a responsive Personal Portfolio Website using React.js, HTML5, CSS3, JavaScript, and EmailJS to showcase technical skills, projects, education, and contact information.
- **Designed** a modern and user-friendly interface with reusable React components, responsive layouts, and smooth navigation for an enhanced user experience.
- **Integrated** EmailJS for contact form functionality and deployed the application on Vercel using GitHub for version control and continuous deployment.
- **Utilized** React.js, HTML5, CSS3, JavaScript, EmailJS, Git, GitHub, and Vercel to build a scalable and professional portfolio website.

INTERNSHIP

Pantech Solution Pvt. Ltd.

2024

- **Developed** a News Aggregator Application using Python Full Stack technologies to collect and display news from multiple sources.
- **Implemented** application features for news aggregation, data retrieval, and database integration to ensure efficient content management.
- **Applied** software development principles throughout the project lifecycle, including application design, implementation, and testing.

TRAINING

JAVA FULL STACK TRAINING - JSpiders, Chennai.
